

Senior Leader Guidance on Way Ahead for USMC ABC Capability (Cost and Performance Information)

Briefer: Mr. John Matthewson
Marine Corps Business Enterprise

The Warfighting Principle of Focus

MCDP 1

Warfighting

U.S. Marine Corps

PCN 142 000006 00

"To devote means to unnecessary efforts or excessive means to necessary secondary efforts

violates the principle of focus....

Focus applies not only to the conduct of war but also to the **preparation for war.**"

ABCM is designed to help us achieve this focus through a fact-basis for installation resource decisions.

Agenda and Purpose

- **Brief Senior Leadership on:**
 - Demand for USMC Cost and Performance Information
 - The role Activity-based Costing (ABC) plays in providing Cost and Performance (C&P) information
 - Potential COAs for generating C&P/ABC information
- **Seek direction on:**
 - Course that USMC should take regarding the collection of Cost and Performance information in general, and ABC information in particular

Purpose of ABC for the USMC

Substantiate POM Initiatives

- Build Balanced Scorecard
- **Identify Cost Drivers**
- **Quantify POM initiatives**
- **Conduct Comparative analysis**

Demonstrate program costs

- **Support CPI/Lean Six Sigma**
- **Identify Indirect Overhead Costs**
- **Calculate Total Cost of Service**
- **Calculate Unit Costs**

Apply Execution data

- **Benchmarking & Best Practices**
- **BRAC, MOU negotiations**
- **SFFAS #4 compliance**
- **DRRS, CDIS, PAR support**

Background

- **USMC Enterprise ABC effort began in April 1999**
 - LF introduced ABC to bases (mid 90's) using Army Corps of Engineers model
 - Enterprise ABC requested for local use by MarFor/base commanders in Apr 98 to support POM98 and A-76 wedges
 - Enterprise ABC was approved by ACMC - assigned to LR for implementation
 - Competition for software provider completed in Jun 99 - installed at 22 sites by 2000
 - Per base MarFor/ base commander input, LR coordinated development of model standards in 00 -02 - permitting comparative analysis of base operations data
 - Shared data warehouse created single interface to legacy systems greatly simplifying work of installation ABC models at 22 sites by 2005
- **ROI on ABC investment**
 - Invested approximately \$6M for software, training, consultant support
 - Return reported by MARFORS approximately \$35M in FY01(met POM wedge)
 - Installations complied with FASAB cost management standards
 - Developed internal ABC capability and ended reliance on consultants
 - Enhanced USMC reputation. Awarded CAM-I's Cost Management Award in 2005

ABC - Current Situation

No steady HQ demand for ABC information

- Data occasionally used at HQ level on ad hoc RFI basis
- Primary HQ customers, LF & MCCS, do not use at all

Demand for ABC results by field commanders mixed

- MARFORCOM, MARFORPAC and LOGCOM would like to continue ABC
- Some bases and HQ elements would like to discontinue ABC
- MCI West briefed Marine Installation Board on information needs - May 07

Installation ABC models are now out of date

- Current ABC models too complex, not updated in a year
- Lost use of models for benchmarking
- Current ABC software needs to be upgraded

Coordination

- **Conducted detailed field survey during 2006**
- **Coordinated proposed way ahead in 2007 MCATS tasker**

ABC Courses of Action

- **COA1: Discontinue ABC Support** (cost = \$0)
 - Bases not required to use ABC
 - No HQ support for data warehouse
- **COA2: Continue ABC on Life Support** (\$600K FY08)
 - COA 2a -- Bases not required to use ABC
 - COA 2b - Bases required to submit ABC models
 - HQ supports data warehouse, ABC Model simplified, standardized.
- **COA3: Revitalize ABC Capability** (\$1.6M)
 - Bases required to use standard ABC model framework
 - ABC software upgraded and modelers trained in its use
 - ABC model results are used by MCIs for benchmarking
 - USMC-wide data can be used to support USMC cost and performance requirements: CDIS, POM, DRRS, PART, PAR

I&L (LF)	COA1	
MCRD SD	COA1	
ABC USER SURVEY RESULTS		COA2

COA 1: Discontinue ABC Support

COA 1: Discontinue HQ ABC support of data warehouse.

- Bases have option to use ABC software.
- HQ Stops funding data warehouse and modeling COP support
- No cost
- **Pros:**
 - Allows for redirection of installation BPO staff
- **Cons:**
 - Visibility lost about what work consumes time spent by 17,000 Marines assigned to bases and stations
 - Loss of cost management capability still requested by bases
 - Loss of tool that could be of useful for LSS, DRRS, CDIS.
 - Data warehouse saves many hours of time to extract data from 8 legacy systems. Instead of one inquiry, will have potentially 22 inquiries into each legacy system.

Continue ABC On Life Support

COA 2a: HQ funds only ABC Data Warehouse support, bases sustain modeling COP.

- Bases not required to build or post standard ABC models.
 - HQ coordinates simplified ABC model standardization.
 - HQ funds \$600K to support shared data warehouse
-
- **Pros:**
 - Base commanders continue to receive requested ABC support
 - Full cost of operations is calculated in accordance with SFFAS#4
 - Visibility is gained about what work consumes time spent by 17,000 Marines assigned on bases and stations.
 - Data warehouse reduces work at all bases to populate models
 - **Cons:**
 - Optional ABC models precludes region-wide benchmarking
 - No support for USMC-wide CDIS reporting requirements
 - Funds to support data warehouse have not been identified.

COA 2b: Continue ABC on Life Support

COA 2b: HQ funds only ABC Data Warehouse support, bases sustain modeling COP.

- Bases required to build and post standard ABC models.
- HQ coordinates simplified ABC model standardization.
- HQ funds \$600K to support shared data warehouse

- **Pros:**

- Base commanders continue to receive requested ABC support
- Full cost of operations is calculated in accordance with SFFAS#4
- Visibility is gained about what work consumes time spent by 17,000 Marines assigned to bases and stations
- Since all bases required to complete ABC models, data can be used by MCI's to benchmark performance
- ABC results can be used to defend POM filings, CDIS elements.
- Data warehouse reduces work at all bases to populate models

- **Cons:**

- Using older version of ABC software is labor intensive
- Funds to support data warehouse have not been identified.

COA 3: Revitalize ABC Capability

COA 3: HQ Funds software upgrade, modeler training.

- Bases required to build and post standard ABC models.
 - HQ coordinates ABC model standardization.
 - HQ funds \$1.6M to support warehouse, training, software refresh
- Pros:
 - Total cost of operations is calculated in accordance with SFFAS#4.
 - Visibility is gained about what work consumes time spent by 17,000 Marines assigned to duty on bases and stations
 - Data can be used to satisfy cost and performance data requirements: LSS, CDIS, DRRS, etc.
 - New software is compatible with NMCI, supported by vendor
 - New software is compatible with CNI = integrated DON capability.
- Cons:
 - Base commanders have not indicated need for upgraded software
 - Funds to support data warehouse, purchase and install new ABC software, and train users, have not been identified.

Recommendation

COA 3: Revitalize ABC Capability

- Bases required to build and post standard ABC models.
- HQ coordinates ABC model standardization.
- HQ funds \$1.6M to support warehouse, training, software refresh

• Pros:

- Total cost of operations is calculated in accordance with SFFAS#4.
- Visibility is gained about what work consumes time spent by 17,000 Marines assigned to duty on bases and stations
- Data can be used to satisfy cost and performance data requirements: LSS, CDIS, DRRS, etc.
- New software is compatible with NMCI, supported by vendor
- New software is compatible with CNI = integrated DON capability.

• Cons:

- Base commanders have not indicated need for upgraded software
- Funds to support data warehouse, purchase and install new ABC software, and train users, have not been identified.

Backup

Selected Comments - MCATS May 07

In Favor

ABC data provides a holistic view of resource consumption

MARFORPAC

ABC supports process improvement programs

MARFORCOM

“ABC used successfully for A76, Lean Six Sigma, and strategic planning.”

MCRD Parris Island

Opposed

ABC Data not timely, relevant.

MARFORRES

Resources not available to do both ABCM and Continuous Process Improvement (CPI)

MARCORBASESLANT

ABC data is “unusable or unavailable.”

I&L (LF)

30 Jan ABC Survey/Report

Report by John Miller, Jim Schmook, and Steve Player

- **Initial local use by base commanders to reduce operating costs and meet budget realignment objectives worked**
- **Subsequent enterprise efforts to standardize models have not achieved expectations**
- **The appropriated fund environment of “spend or lose funding” militates against cost reducing initiatives**
- **PPBES driven culture is displacing the ABC/M effort**
 - PPBES could be leveraging ABC as only source of total cost and mil labor
 - Use of ABCM to support decisions is low at all command levels
 - Current usage, benefits and ROI do not meet expectations
- **3 COAS identified**
 - Make ABC/M optional
 - Revise the strategy and refresh the software
 - Modify ABC/M to a limited MC Cost/performance requirement

Who Demands Cost and Performance Data?

CONGRESS

Prepare performance plan covering each program in the budget

GPRA

PRESIDENT

Integrate performance with associated cost.

President's Management Agenda

SECDEF

Integrate Budget and Performance

MID910 FASAB

Managerial Cost Account Standards
SFFAS #4

SECNAV

All costs associated with the process... must be considered [emphasis added]

Unit Costs

Summary: Determining the Cost and Performance of Operations is Required

Question 1:

How should
C&P
information
be gathered?

Question 2:

How should
C&P
information
be used?

Obstacles...

. . . to adoption of Cost and Performance Management

Improved business processes could reduce costs by eliminating unnecessary work;

BUT...

Managers are penalized if funds are not spent by year-end.

AND

Productivity gains are needed to offset budget cuts and redirect funds to higher priority work;

BUT...

Many employees won't contribute or help carry out labor saving ideas if they think their jobs are at risk as a result.
